### True/False

Similar to multiple choice focusing on precise understanding of facts and principles

### Short Answer/Essay

These demand a deeper understanding requiring you to explain concepts compare algorithms or analyze problems

### Programming Problems

- 1 Read the Question Carefully Pay close attention to keywords like always never sometimes except etc These significantly impact the correct answer
- 2 Eliminate Incorrect Options Begin by ruling out obviously wrong answers This narrows down your choices and improves accuracy
- 3 Apply Concepts Don't just guess Recall relevant definitions theorems or algorithms from the chapter to justify your selection
- 4 Example Question Which of the following is NOT a high-level programming language a Python b Assembly c Java d C The correct answer is b Assembly as it is a low-level language

### B Short Answer/Essay Questions

- 1 Understand the Prompt Identify the core concepts the question is testing

- 5 Concise and Precise Avoid unnecessary jargon or rambling Get to the point and answer the question directly
- 6 Example Question Compare and contrast breadth-first search and depth-first search algorithms Your answer should define both algorithms highlight their differences in exploration strategy queue vs stack discuss their time and space complexities and provide examples of when each is preferred

### C Programming Problems

- 1 Break Down the Problem Divide the problem into smaller manageable subproblems
- 2 Develop an Algorithm Design a step-by-step plan to solve each subproblem Use pseudocode to outline your solution before coding
- 3 Choose an Appropriate Data Structure Select the most efficient data structure based on the problem requirements
- 4 Test Thoroughly Test your code with various inputs including edge cases and boundary conditions to ensure it works correctly
- 5 Example Question Write a function to find the factorial of a number Your answer should include the function definition appropriate error handling eg for negative input and comments explaining the logic
